A7682S

SIMCom LTE Cat 1 Module

Product Description

A7682S is the LTE Cat 1 module which supports wireless communication modes of LTE-FDD/LTE-TDD based on the latest ASR1606 platform. It supports maximum 10Mbps downlink rate and 5Mbps uplink rate.

A7682S adopts LCC+LGA form factor and is compatible with SIM800C and SIM868(2G modules), which enables smooth migration from 2G products to LTE Cat 1 products, and greatly facilitates more compatible product design for the customer needs.

A7682S supports multiple built-in network protocols and drivers for main operation systems (USB driver for Windows, Linux and Android). The software functions, AT commands are compatible with the A7672S series modules. Meanwhile A7682S integrates abundant industrial standard interfaces with powerful expansibility, such as UART, USB, I2C and GPIO, which makes it perfectly suitable for main IOT applications such as telematics, surveillance devices, industrial routers, and remote diagnostics etc.
